Leveraging Digital Learning Resources to Differentiate Learning

System assesses learners and automatically places them. LF reviews placements for accuracy and alignment of program to their needs.

LF sets goals for use with learners. Both LF & learners monitor.

Learners are provided immediate feedback on progress within program.

LF monitors data on a weekly basis (at a minimum) to track learners' progress and time on task.

LF uses data to differentiate instruction for individuals and small groups. LF identifies additional resources to support learning needs.

LF utilizes time that learners are on tech. to provide differentiated based upon data and focused on specific need of learners.
